DETAILED ACTION

1. Applicant's election without traverse of Group II, Species III (claims 2-3, 5, 7, 9, and 11) in the reply filed on 3/05/10 is acknowledged.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 2 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 18 of copending Application No.

11/328255 in view of Yamaha Corp. (JP2004006752A) (see the cited Partial English Translation, Si substrate 11). Claim 18 of copending Application No. 11/328255

discloses substantially the same invention as claimed, except for the substrate not

being a semiconductor substrate. Yamaha Corp. (JP2004006752A) discloses a method for making a magnetic sensor on a semiconductor substrate. It would have been

Art Unit: 2858

obvious to one of ordinary skill in the art at the time of the invention to modify claim 18 of copending Application No. 11/328255 by employing a semiconductor substrate as taught by Yamaha Corp. (JP2004006752A) in order to manufacture semiconductor magnetic sensors or semiconductor devices which include magnetic sensors for mass production purposes.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

4. Claims 3, 5, 7, 9, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
